

CHAPTER WINTERIZING

Winterizing the Goose

After the excursion season:

(From Joe Becker, December, 2014)

Dolores Colorado normal winter:

continuous sub-freezing temps are expected.

- Remove the battery and store upstairs in a heated area during the winter

 - Place a 1lb. coffee can over the vertical exhaust pipe on goose.
(The designated exhaust pipe cover couldn't be located. ... mother of invention.)

 - Drained the water from the tank inside the freight box.

 - Tie Rudolf the Red-Nosed Reindeer to the front of the "goose" for midnight travels.
(Good call.)

 - Verify engine coolant is sufficient to avoid freezing, or drain coolant.
-
